OBJECTIVE

I am a results-driven Full Stack Web Developer specializing in captivating user experiences and seamless design-to-functionality integration. With expertise in front-end and back-end development, I ensure responsive, UI/UX friendly websites that drive success. Let my skills supercharge your projects and elevate your online presence through effective SEO techniques. Seeking a new opportunity to apply my experience and knowledge within your firm.

WORK EXPERIENCE

12/2023 Till Present

Full Stack Web Developer (Part-Time) at Imajin8

- Expertly crafted dynamic websites on the WordPress platform, utilizing builders and coding from scratch. Proficient in PHP, HTML, CSS, JavaScript, jQuery, SQL, excelling in creating custom themes and plugins for a standout online presence.
- Led the development and maintenance of dynamic new websites, pushing the boundaries of creativity and functionality.
- Revolutionized existing websites through editing, design enhancements, addition of new pages, and content refinement for an elevated user experience.
- Proficient in SEO strategies, ensuring top-notch website rankings. Diligently monitored performance metrics, utilizing tools like Google PageSpeed Insights, to optimize speed and enhance overall user experience.
